Virtual F&I™ Menu

Your Enhanced Customer Connectivity Solution

With our vMenu, you can present on touch-screen devices, large monitors in your location or see what your customers are seeing live - virtually. View your screen and your customers' screen at the same time to ensure full transparency and minimize any unnecessary discrepancies. Make updates and edits all live and in real-time without interruptions or distractions. With the seamless integration of point-of-sale materials and tools contained within the application itself, our platform provides a customized user experience.

Leverage AI-driven algorithms to provide personalized recommendations tailored to customer purchase history, vehicle choices, and finance options.

Ensure full transparency with real-time pricing and product coverage details accessible at every stage of the process.
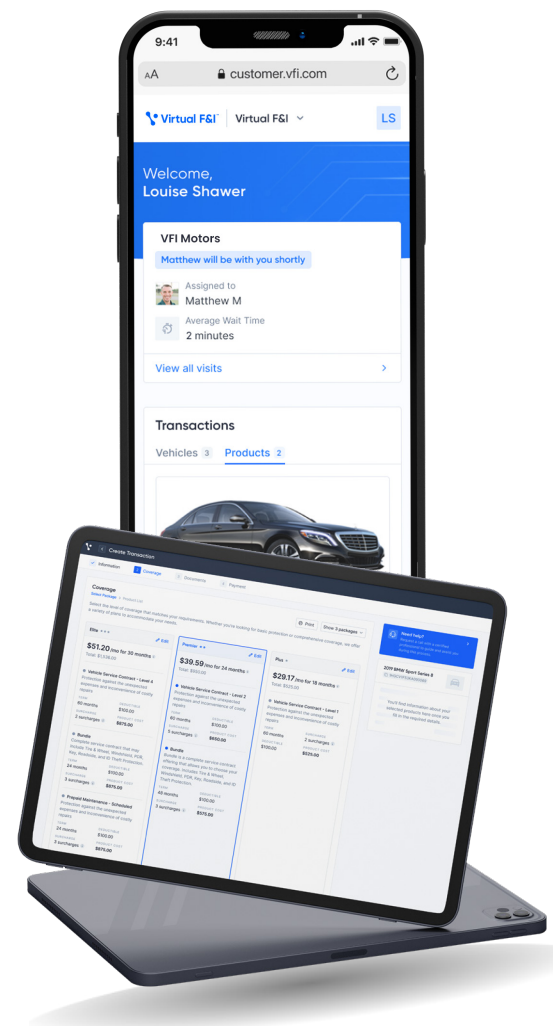

Utilize customizable menu configurations featuring real-time product ratings and dynamic adjustments to enhance deal closures.

Integrate seamlessly into existing Dealer Management Systems, allowing for efficient data synchronization.

Streamline your workflow by quickly generating quotes, storing contracts, and easily accessing customer recall points, all within one seamless customer relationship management platform.

Transform your dealership with Virtual F&I! Shorten trade cycles, enhance customer retention, and skyrocket sales. Book your personalized demo today and see how our innovative VFI Menu technology can revolutionize your Sales and F&I operations. **Don't miss out—contact us now!**
